Purification of MMP-3 (Matrix metalloproteinase-3)

Hang man Park. *et al.*

(AnGang Medical School, China)

This paper reports using anti-MMP-3 McAb preparing affinity chromatographic column. From neonatal fibroblast culture purifying MMP-3, total recovery rate reaches 70.4%. Comparing with Okada *et al* (1988) reported from rheumatoid synovial fibroblast secreting fluid purifying MMP-3, its recovery rate was 39%, the former is higher than the later.
