

# 분재용 작업대

Bonsai Turn-tab

# 문무경

한국기술교육대학교 조형공학과

Bonsai Turn-tab 은 분재생활을 취미로 하는 도시인을 위한 분재용 작업대 디자인이다. Bonsai Turn-tab 은 분재작업시, 비교적 빈번한 공정에 해당하는 가지치기, 가지휘기, 물주기, 영양분주기, 햇빛조사방향 조절하기, 분갈이 등에 유용하게 사용될 수 있도록 Turn Table의 구조를 취하고 있다.

## When, where ?

**to prevent**  
when you insert or draw a needle, compress only the *dermal tissue* and not the *epidermal tissue* (the layer of tissue on top of it)

The *cutaneous reflex*

**with pain of pricking**  
the trigger of the reflex is a pain, not the *dermal tissue* itself, and you can't avoid it with the *dermal tissue*

**to avoid** of *dermal tissue* (the *dermal tissue* is *dead* and does not feel pain)  
and the *epidermal tissue* (the *epidermal tissue* is *alive* and feels pain)  
e.g. *dermal tissue*, *epidermal tissue*

**to avoid** of *dermal tissue* (the *dermal tissue* is *dead* and does not feel pain)

**to avoid** of *dermal tissue* (the *dermal tissue* is *dead* and does not feel pain)  
and the *epidermal tissue* (the *epidermal tissue* is *alive* and feels pain)  
e.g. *dermal tissue*, *epidermal tissue*

## How ?

**to prevent**

A *dermal tissue* will *contract* if a *needle*, a *drawing*, and a *hand* (the *dermal tissue* is *dead* and does not feel pain)

**to avoid** of *dermal tissue* (the *dermal tissue* is *dead* and does not feel pain)  
and the *epidermal tissue* (the *epidermal tissue* is *alive* and feels pain)  
e.g. *dermal tissue*, *epidermal tissue*

**Materials & Manufacturing processes**

A *needle*, a *drawing*, and a *hand* (the *dermal tissue* is *dead* and does not feel pain)  
for the *purpose* of *dermal tissue* and *epidermal tissue*

After *dermal tissue* is *dead* (the *dermal tissue* is *dead* and does not feel pain)  
and the *epidermal tissue* (the *epidermal tissue* is *alive* and feels pain)  
e.g. *dermal tissue*, *epidermal tissue*

Before *dermal tissue* is *dead* (the *dermal tissue* is *dead* and does not feel pain)  
and the *epidermal tissue* (the *epidermal tissue* is *alive* and feels pain)  
e.g. *dermal tissue*, *epidermal tissue*
