1. The definition of wildflowers

The definition of wildflowers of Korea means all the wildflower that grow in Korea and ground cover plants, and it includes annuals, perennials, bulbs, kind of herbs, woody plants, kind of mosses, kind of grass, and water plants. The native plants mean the spontaneous plants that grow in the field and mountains on its own in broad definition, and indigenous plants in narrow definition. But plants that grow in Korea and brought in from other countries are called naturalized plants.
