### Market Environment of Business

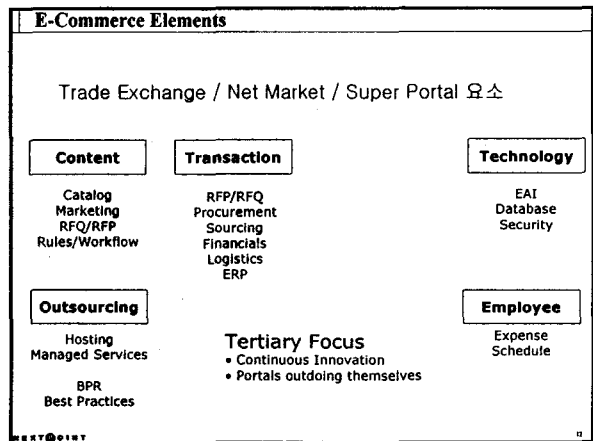

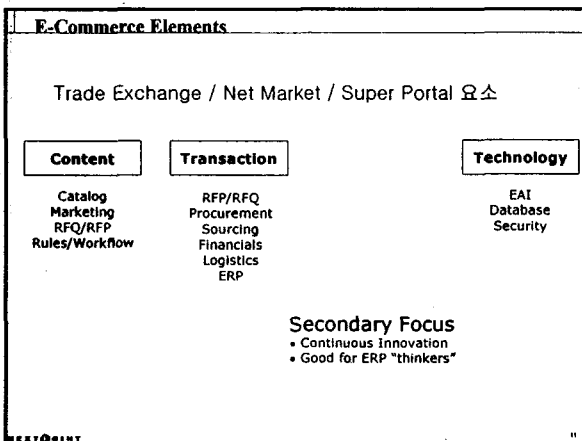

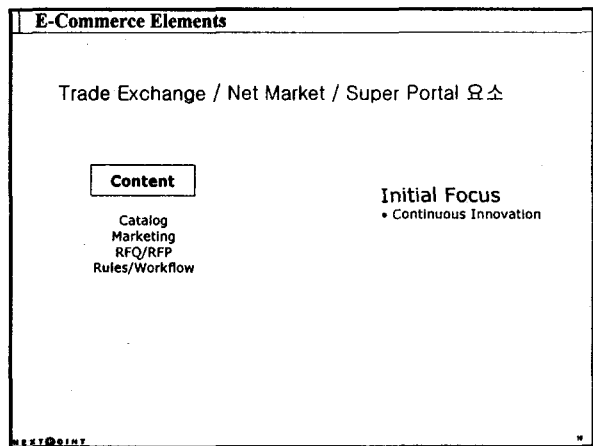

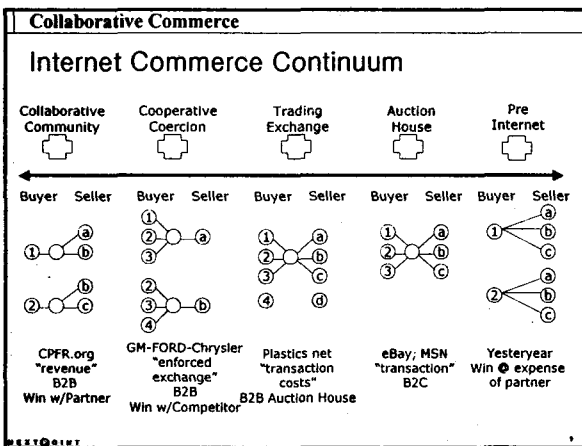

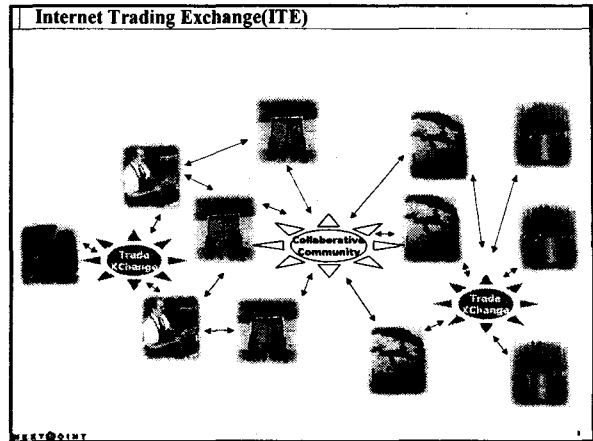

- Procurement inefficiencies
  - Material and Purchase Process Cost reduction
- Sourcing not proactive
  - Lack of visibility disrupts ability to deliver
- Poor collaboration impedes ability to meet demand
- Communications impeded by product content negotiation

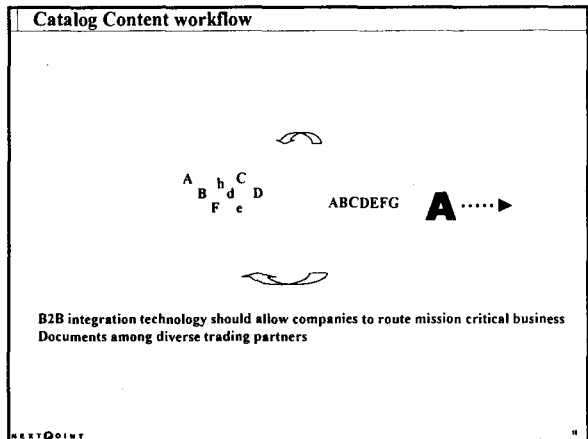

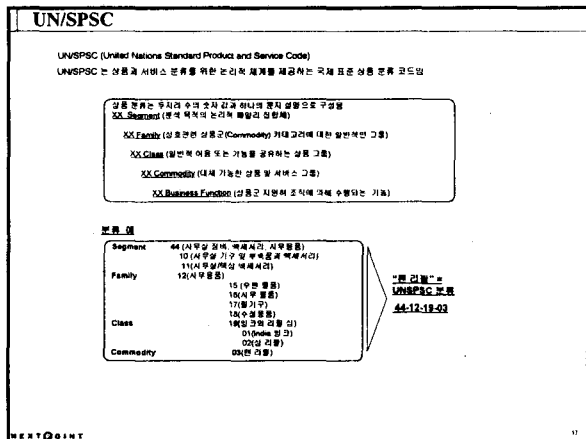

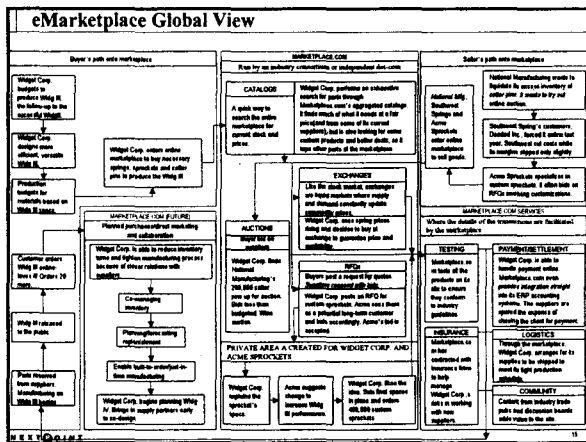

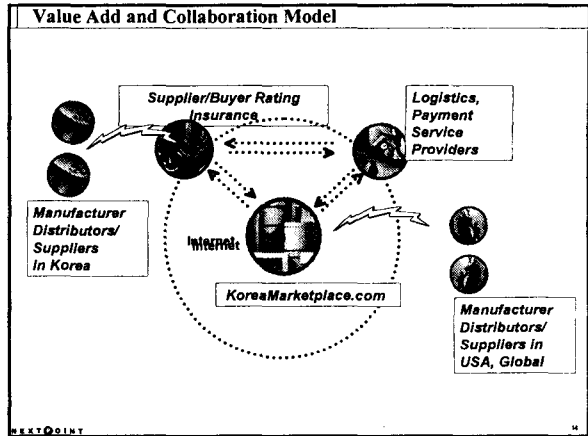

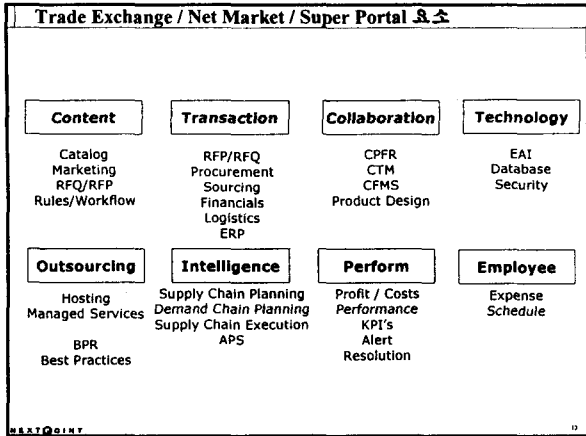

**Profit Cycles Shrinking**

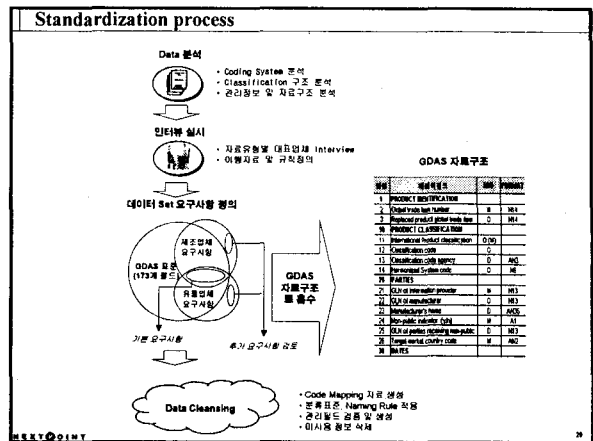

**Sourcing Uncertainty**

Which Parts  
Which Suppliers  
What Price  
What Availability

eMarketplace in Supply Chain		
To Seller	To Marketplace Host	To Buyer
Provides new marketing and distribution channels to customers	Protects current role or creates new role within the commerce chain	Lowers up-front costs and risks
Provides better customer services through online interaction	Establishes value-add in digital economy	Gains access to more information and suppliers
Offers more complete product information to buyer	Increases service levels to existing customers	Provides access to secondary and excess supply auctions
Automates order/fulfillment	Leverages current information and customers	Eliminates ongoing software upgrades & maintenance costs
Lowers overall operational costs	Provides access to more information and suppliers	Utilizes outsourced expertise

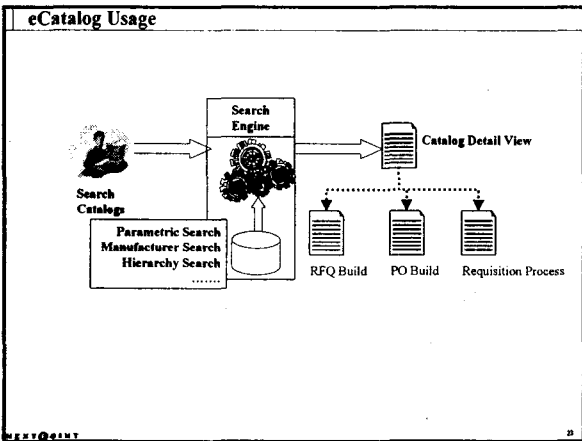

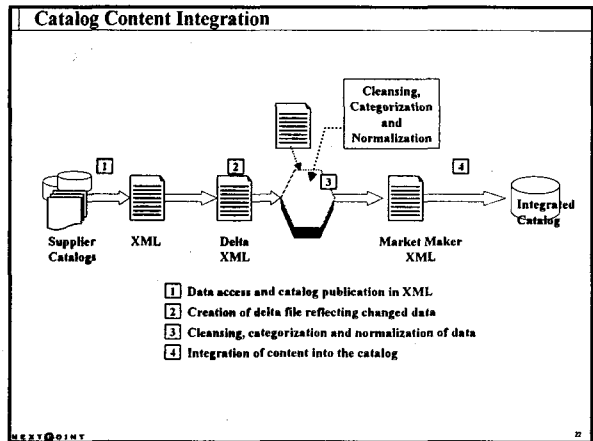

### GDAS

GDAS(Global Data Alignment System)

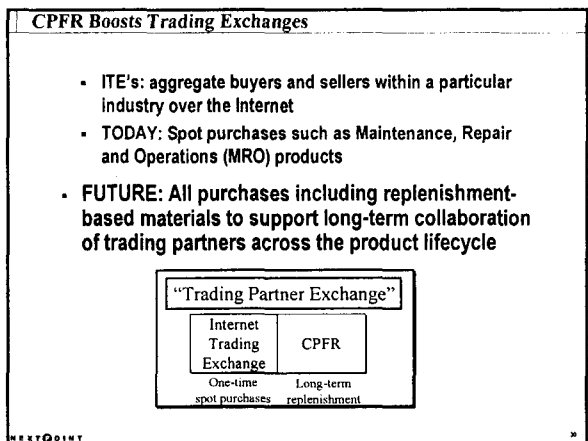

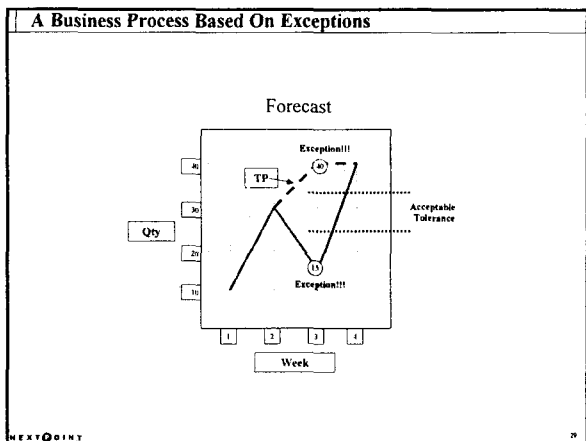

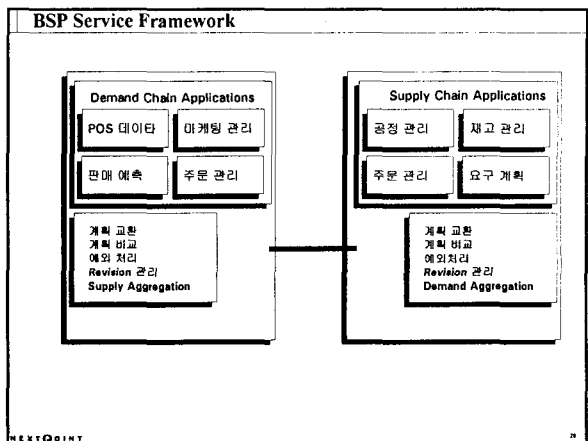

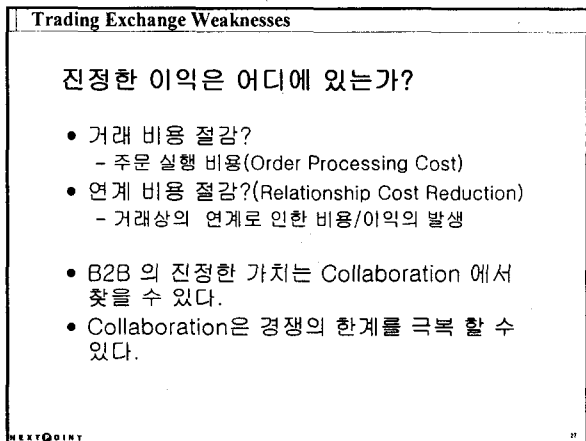

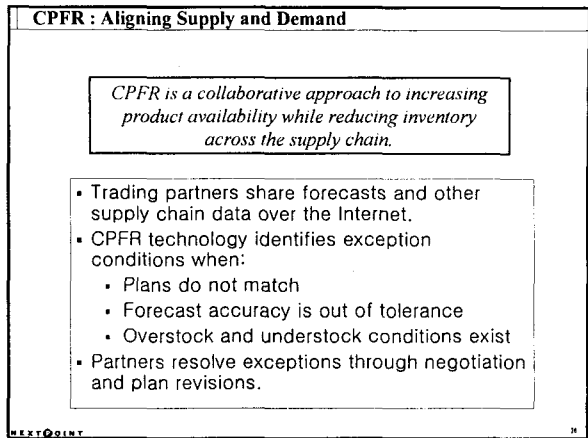

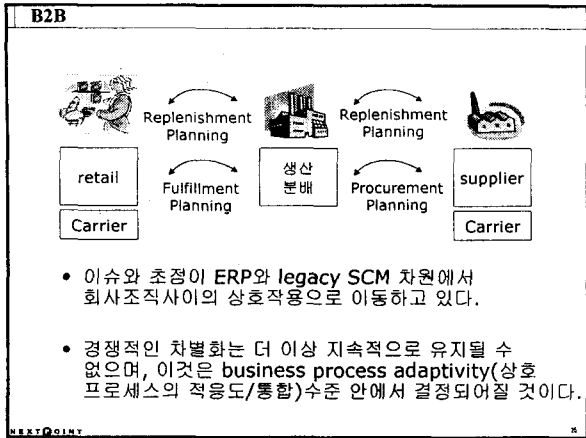

국제 상품코드추진기관(CAN, Internal, Local/AUC)에서 Global 표준 기반인 국제관 전자카탈로그 연계 및 효율성을 위해 개발한 국제 개발보고서 국제 표준 (데이터 집합방식 (12개 그룹)으로 정의되며, 173개 데이터 필드로 구성)

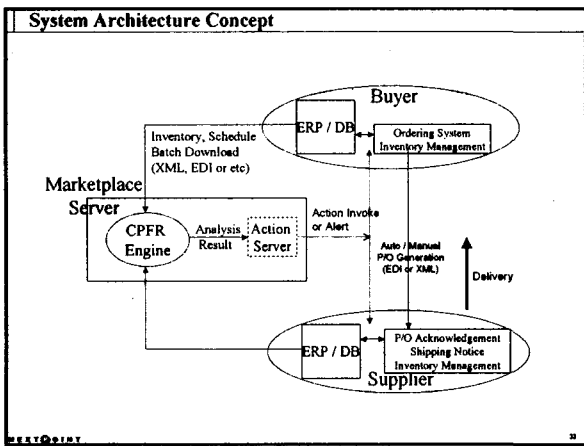

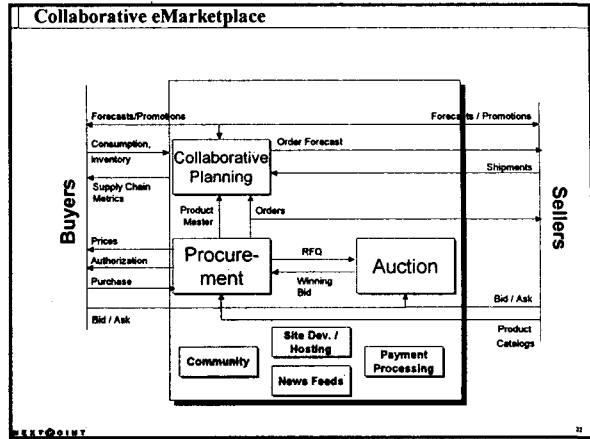

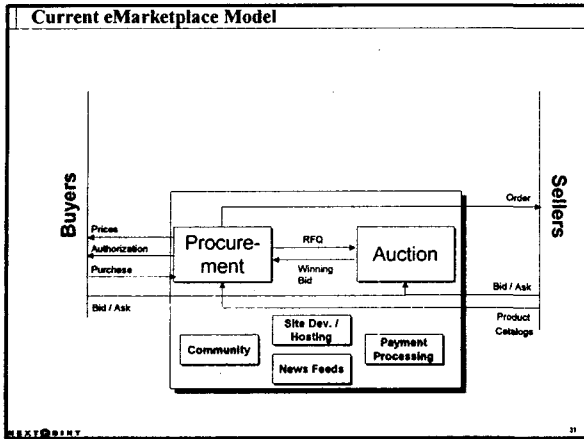

**GDAS 구조**

Product Identification	Product Classification	Parties	Dates	Description	Measures
<b>GROUP 01</b> EAN/UCC-8, UCC-12, EAN-13, EAN/UCC-14 (2개 필드, Unique Key Code)	<b>GROUP 10</b> UNSPSC HS, 품목 코드 관리 기준 (2개 필드)	<b>GROUP 20</b> ISP 3185 Code (국가 코드), GUN(Global Location Number) (2개 필드, 상품명칭, 공급처 코드 포함)	<b>GROUP 30</b> COYMM(DOHMM) (유니코드 상품 출처 표시), DATE (일월년) (3개 필드, 상품명칭, 제조/판매 코드 포함)	<b>GROUP 40</b> Product Name, Lang (ISO 639), PLUP (Price Look Up) (13개 필드, 상품명, 제조/판매 코드 포함)	<b>GROUP 60</b> ISO Packaging Standard, UNECE Recommendation (2개 필드, 상품명, 제조/판매 코드 포함)
Packaging	Commercial Data	Handling & Hazardous	Product Hierarchies	Attributes	Packing Configuration
<b>GROUP 80</b> ISO 639 (언어 코드), UNECE Recommendation (1개 필드, 포장명, 제조, 포장재명 코드 포함)	<b>GROUP 110</b> ISO 4217 (통화 코드), UNECE Recommendation 21 (10개 필드, 가격, 가격 조정단위, 세금 포함)	<b>GROUP 130</b> UNECE Recommendation 21 (2개 필드, Hazard 코드, 위험분류, 취급방법 포함)	<b>GROUP 140</b> GTIN (Global Trade Item Number) (12개 필드, Base Line, GTIN Next Level 포함)	<b>GROUP 150</b> UNSPSC Recommendation 21 (21개 필드, 품명, 품명, 유닛 코드 포함)	<b>GROUP 180</b> 5개 필드, Net Trade Item no, complete layer, 포장명, Trade Item no, 상품 번호, 포장명 포함)

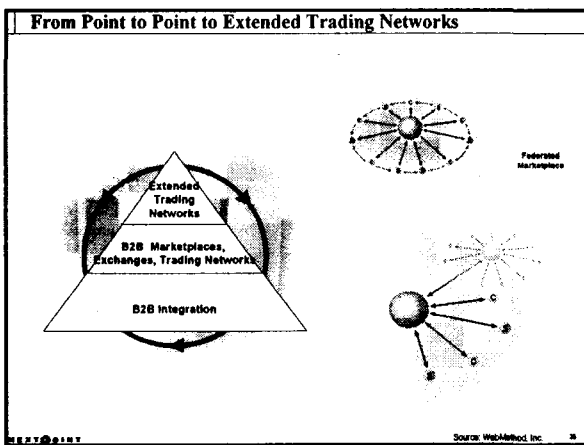

✓ Collaboration : CPFR

✓ Process Integration

### Issues for eMarketplace Integration

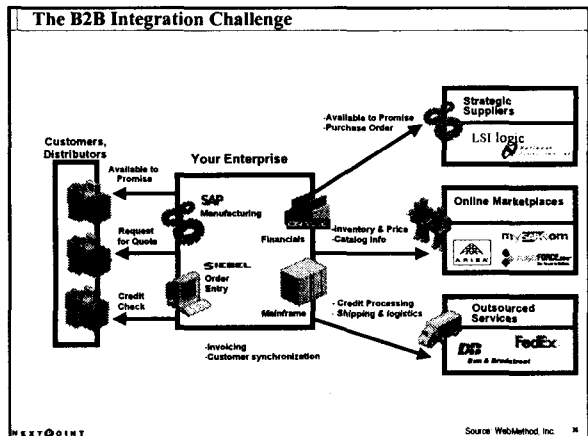

Tightened integration with major suppliers	85.7%
Increased opportunities for smaller business to compete with bigger business	64.8%
Classification of some products as commodity products	63.8%
Creation of new markets or market niches	55.2%
Increased total number of business within the industry	33.3%
Decreased total number of business within the industry	28.6%
Other	1.0%
Don't know	1.9%

### Issues of eMarketPlace Integration

QUESTION	IMPLICATIONS FOR SUPPLIER	IMPLICATIONS FOR BUYER
What level of integration does the exchange offer?	Most offer some document exchange. But only some offer full integration with back-end catalog and transaction system.	Some exchanges provide access only to raw data, other can integrate data directly into ERP or procurement applications.
What integration platform does the exchange use?	Popular integration tools don't necessarily provide data mapping between back-end applications and exchanges.	Off-the-shelf applications are easier to integrate than legacy or custom-built programs.
How long will integration take?	Links to customized or legacy apps could take months for each marketplace.	Many buyers are holding off on integration until they develop a standard interface that works with multiple exchanges.
Does the e-marketplace's integration methodology work for my business?	Some e-marketplaces use inflexible catalogs that don't account for subtle differences among industries.	Some e-marketplace integration strategies are designed to fit the buying needs of just a few large players.
Does the e-marketplace's integration methodology work for my back-end apps?	Some e-marketplaces have difficulty integrating with customized and industry-specific catalogs and apps.	Some e-marketplaces handle integration for only the most popular back-end application.

## ✓ Application Framework
