¹Department of Biology, Ningbo University, Zhejiang, China 315211.

²College of Life Science, Hunan Normal University, Changsha, Hunan, P. R. China 410081.

³Department of Biology, College of Natural Sciences, Dongguk University, Seoul 100-714 and The Arachnological Institute of Korea, Seoul 133-040, Korea.

Two new species, *Coelotes wugeshanensis* sp. nov. and *C. yanlingensis* sp. nov. are described based on the specimens collected from Hunan Province, China. The male of *Coelotes wugeshanensis* is similar to *Coelotes argenteus* Wang *et al.*, 1990, but differs in the form of median apophysis and the tibial apophysis of the palpal organ. *Coelotes yanlingensis* sp. nov. is allied to *Coelotes variegatus* Wang *et al.*, 1990, but it can be distinguished by the ball-shape of spermatheca, that of the latter kidney-shaped.

Key Words: Amaurobiidae, *Coelotes wugeshanensis* sp. nov., *C. yanlingensis* sp. nov., China

Z 114 **One New Species of the Genus *Argyroides* Simon, 1864 (Araneae: Theridiidae) from China**

Xiang Xu¹, Chang-Min Yin¹, and Joo-Pil Kim²

¹College of Life Science, Hunan Normal University, Changsha, Hunan, P. R. China 410081.

²Department of Biology, College of Natural Sciences, Dongguk University, Seoul 100-714 and The Arachnological Institute of Korea, Seoul 133-040, Korea.

A new species of theridiid spiders, *Argyroides yunnanensis* sp. nov. from Yunnan Province, China, is described. This new species is similar to *Argyroides xiphias* Thorell, 1887, but can be distinguished from the latter by a wide silver pattern of abdomen, pocket-shaped atrium, spermathecae and fertilization.

Key words: Theridiidae, *Argyroides yunnanensis* sp. nov., China
