Indirect Composite Restorative Systems and Update on Adhesion Dentistry 2002

Dr. 서병인 (미, Bisco, Inc. 사장)

1960 성균관대 화학과 졸업
1967 California State University 화학과 대학원졸업
1981~현재 Bisco, Inc. 설립자, 사장
2000~현재 연세대 치대 외래교수

* 논문 및 특허 : Composite Resin 과 Bonding에 관한 많은 논문과 특허

A. Present a new system in comparison with other existing indirect composite processing units.

B. There are so many new adhesives in the market, including the single step, self-etching adhesives. Clinicians are confused with which adhesive to choose for a certain clinical procedure and are not aware of the incompatibility between some of the newer

acidic adhesives and composite luting cements, especially, when placing the indirect composite or porcelain in/onlays and crowns. This presentation will assist the clinician in understanding the clinical implications of the research data on newer adhesives and choosing the right adhesive-luting cement combinations for a successful long-term clinical results
