

Taxonomy of the Korean *Megarthus* Curtis (Coleoptera: Staphylinidae: Proteininae)

Kim, Myeong-Hee and Kee-Jeong Ahn

Department of Biology, Chungnam National University

A taxonomic study of the genus *Megarthus* Curtis in Korea is presented. Four species are recognized, three of which are reported for the first time in Korea (*Megarthus aino*, *M. corticalis*, *M. incubifer*). The diagnoses, illustrations of diagnostic features and a key to the species of Korean *Megarthus* is presented.
