

## HEROs in the Universe

임 명신<sup>1</sup>

<sup>1</sup>서울대학교, 지구환경과학부

HEROs (Hyper Extremely Red Objects) are objects which are very red in Near-Infrared (NIR) colors ( $J-K > 3.0$ ). They are speculated to be intrinsically red galaxies at redshift  $z =$  about 2.5, or Lyman-break galaxies at  $z > 10$ . I will discuss recent discoveries of HEROs and how HEROs can be used to explore the galaxy formation in the early universe.
