**Screening and Culture Condition Characterization of
Fibrinolytic enzyme from *Bacillus* sp.**

Ji-Won Hwang, Sang-Hyun Park, Hee-Young Ahn, Min Ok and Young-Su Cho

Department of Biotechnology Dong-A University

Bacillus sp. strain, which produces a strongly fibrinolytic enzyme, was screened from soil. The fibrinolytic enzyme was purified from supernatant of *Bacillus* sp. strain culture broth and showed thermophilic, hydrophilic, and strong fibrinolytic activity.
