핵심용어 : 무선통신, 표준해사영어, 인적오류

Key Words : Radio communication, SMCP, Human error

SMCP 코드화 무선통신 | 해양안전사고 예방시스템 기반연구

1. 연구 목적

- Reducing Maritime communication error different from English pronunciation
- Those who also speak in English by mother tongue use different English words and accent
- Ex) English: Petrol, Waistcoat; American English: Gas, Vest
- SMNV(Standard Maritime Navigational Vocabulary) was adopted by IMO in 1977. In the early 1990's IMO realized the importance of a more comprehensive standardized safety language covering all major safety-related verbal communication. finally SMCP was adopted in 2001
- There are still maritime communication errors because of a different English pronunciation
- This technology prevent the errors between seafarers who not speak in English by mother tongue
