요약 : The COVID-19 pandemic had substantial negative impacts and caused several disruptions to the global supply chain of the shipping industry. The key challenges identified in terms of maritime manpower are the Certificates of Competency (CoC) or the expiration and/or failure to complete refresher and/or revalidation courses, which directly hinder employment retention and lost opportunities at sea. To tackle this issue directly and swiftly, the creation of the APEC SEN Distance Learning Platform was suggested and approved by APEC as part of an official project. This paper introduces the APEC-wide accessible distance learning platform with the following key topics: the organisation and operation of the platform, the themes and content to be prioritised, the process of education, training, certification, and the ways to promote accreditation, mutual recognition on CoC, education and training videos by taking collaborative actions, and the development of content.

핵심용어 : distance learning platform, online maritime education and training, certificates of competency, platform structure and contents

APEC SEN Distance Learning Platform

International Cooperation for Seafarers

- 01 | Maritime Education and Training**
Strengthening employability through online and offline maritime education and training
- 02 | Recruitment, Career Development and Job Transition**
Re-training for job transitions in the digital age to come
- 03 | Seafarers' Welfare**
Attaining better welfare by providing collaborative supports

Seafarers in the APEC regions

WHAT IS APEC?

The Asia-Pacific Economic Cooperation (APEC) is a regional economic forum established in 1989 to leverage the growing interdependence of the APEC's 21 member economies aim to promote greater economic growth and regional prosperity by promoting a balanced, inclusive, sustainable and innovative community in the Asia-Pacific region.

Why APEC SEN?

Maritime Education and Training

01 | Maritime Education and Training

Strengthening employability through online and offline maritime education and training

- Seafarer ExcellenceNetwork (SEN) On-Board Training to Foster Competent Young Future Maritime Global Leaders
- APEC Seafarers Excellence Network (APEC SEN) Maritime English Communication Package
- Post COVID-19 Reaction APEC SEN Distance Learning Platform for Seafarers

Distance Learning Platform: APEC SEN Academy

Life Raft External Structure
Cable to prevent the container on the deck.

Foam extinguisher
A foam extinguisher is used for putting out class B and class A fires.

Life Raft Components
Mask, Gauge, Regulator.

Time daily at least 25 seconds, if fitted.

Contents Development for MET

Davit Launched Lifeboat

Activity
Once the abandonment has been decided, all people onboard must escape from the ship as soon as possible. The following shows the procedure for escaping the ship with lifeboats that are of the davit launching type. Refer to the following instruction to explain the escape steps to your partner.

- Assemble and embark on the boat.
- Remove the boat securing devices and the battery cable.
- Lower the boat by operating the davit brake.
- Float the boat on the water and start the engine.
- Open the release hooks and escape from the ship.
- Rescue other survivors on the water.
