

Erratum

Int. J. Indust. Entomol. Vol 10, No. 2, 2005, pp. 137~141

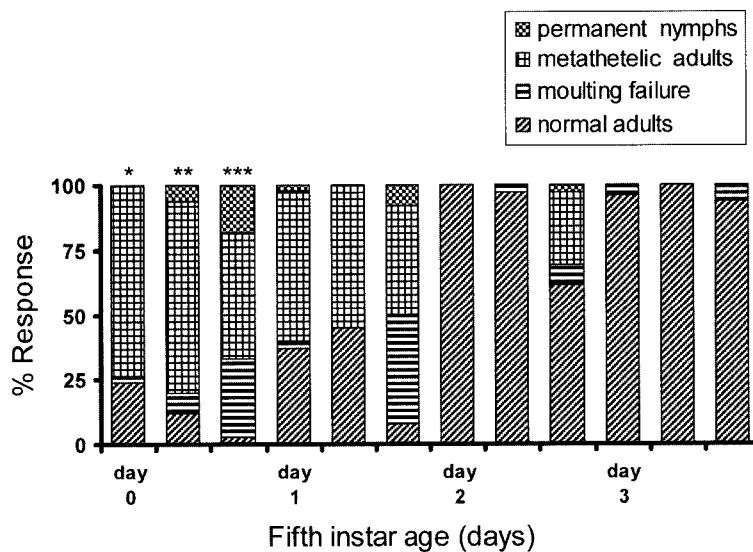

Acquiring Vitellogenic Competence in the Rice Pest *Nilaparvata lugens* Stal: Effects of a Juvenile Hormone Analogue, Hydroprene

A. R. Pradeep* and V. S. K. Nair

Department of Zoology, University of Calicut, Pin-673 635, Kerala, India.

(Received 24 January 2005; Accepted 3 June 2005)

⇒ The Fig. 1 in pp. 138 should be replaced with following figure.

Information for Contributors

Scope

International Journal of Industrial Entomology is devoted to the advancement of industrial interest and knowledge concerning sericulture, apiculture, entomopathogenic microorganism, insect cell culture, insect biotechnology, products derived from insects, insect resources, and the related fields.

Types of manuscripts

International Journal of Industrial Entomology publishes contributions, written in English, in the form of (1) *Full papers*, (2) *Short communications*, (3) *Notes* and (4) *Reviews*. *Reviews* are usually invited by the Editor. Those who submit *Reviews* should consult with the Editor-in-Chief in advance. *Reviews* should not exceed 40 double-spaced pages of text. *Full papers* are original research articles that should not exceed 20 double-spaced pages with precise description and interpretation of experiments. *Short communications* and *Notes* are research reports of new findings, which are not sufficient to form the basis of full paper. These papers should not exceed 10 double-spaced pages of text. The title and reference pages of these papers are not included in the text pages.

Submission of manuscripts

All manuscripts for submission should be sent to the below address:

Dr. Iksoo Kim

Managing Editor, Department of Agricultural Biology, The National Institute of Agricultural Science & Technology, Rural Development Administration, Suwon 441-100, Korea.

Tel: +82-31-290-8574; Fax: +82-31-290-8543; E-mail: ijiekorea@hanmail.net

Each paper must be submitted in triplicates, one original and two copies, each including all illustrations. For the foreign submitters electronic submission is also encouraged. In this case, e-mail address of the corresponding author is important and general server must be provided.

Conditions

Submission of articles is understood to imply that the article is original and unpublished and is not being considered for publication elsewhere. It is the authors responsibility to obtain permission to reproduce illustrations, tables, etc. from other publications. Accepted papers become the permanent property of

International Journal of Industrial Entomology and may not be reproduced by any purpose, in whole and in part, without the written consent of both *International Journal of Industrial Entomology* and the author(s) of the article.

Organization of Manuscript

Suggested organization of paper is as follows: (a) title page (title, affiliation, authors, and running title), (b) Abstract (300 words or less), (c) Introduction, (d) Materials and Methods, (e) Results, (f) Discussion, (g) Acknowledgments, (h) References. In some cases, presentation will be more effective if you combine some of these sections, *e.g.*, Results and Discussion, particularly for short papers. *Reviews* should have a title page, Abstract and References in the same style as full papers. The main body of *Reviews* may be prepared with appropriate sectioning with the author(s) own discretion.

Form of manuscript

Manuscripts should be written on good quality A4 or US letter size paper, and double-spaced throughout on one side of white typewriting paper with 2.5 cm margins on all sides. The abstract should not exceed 300 words, and the abstract, table, figure legends and footnotes should be typed on separate sheets, but these can be included within the same text file if possible. The use of footnotes to the text is not recommended. Text sheets must be numbered successively in all pages from the title page to the end of text (up to references) at the center of the bottom. Cite references by an alphabetical order of the first author name [*e.g.*; (Kim, 1999, 2000), (Kim and Lee, 1999), (Kim *et al.*, 1999), (Kim *et al.*, 1999; Park *et al.*, 1997), (Lee, 1999a, 1999b)]. Same is applied to the other section of manuscripts.

(Title page) The first page of the manuscripts should contain the title, authors (full name) and affiliations of authors, and phone/fax numbers and e-mail address of the corresponding author. Authors with different affiliation should be identified by the use of a superscript linking the name an affiliation. At the bottom of the title page a short running title of no more than 65 characters should be provided.

(Abstract) Abstract should not exceed 300 words. All manuscript should have 3 to 7 key words or short phrases following the abstract. Abstract should be written in bold.

(Introduction) Introduction should provide sufficient background information and the rationale for the present study, but should not include an extensive review of the literature.

(Materials and Methods) Materials and Methods should provide sufficiently detailed information to allow the experiments to be repeated by others. Materials and Methods may be organized into subheadings.

(Results) Results should describe the results of the experiments. Results may be organized into subheadings. Present the results as concisely as possible. Number figures and tables according to the order of citation in the text [*e.g.*, (Table 1), (Fig. 1), (Fig. 1 and Table 1), (Table 1 and 2), (Fig. 1A), (Fig. 1 and 2)].

(Discussion) Discussion should be concise and provide an interpretation of the results in relation to previously

published work and to the experimental system. Discussion may be organized into subheadings.

(References) References must be in alphabetical order by first author; Follow the styles shown below:

1) One author

Kim, J. (2000) Utilization of insect hormone for the development of insecticide. *Korean J. Genetics* **25**, 255-260.

2) Two authors

Jin, B. R. and H. J. Hong (1995) Characterization of murine-human chimeric antibody with specificity for the pre-S2 surface antigen of hepatitis B virus expressed in baculovirus-infected insect cells. *Virus Res.* **38**, 269-277.

3) More than two authors

Jin, B. R., H. K. Kang, E. K. Han and H. J. Hong (1995) Characterization of murine-human chimeric antibody with specificity for the pre-S2 surface antigen of hepatitis B virus expressed in baculovirus-infected insect cells. *Virus Res.* **38**, 269-277.

Jin, B. R., H. J. Yoon, P. V. Choudary and S. K. Kang (1997) Characterization of recombinant *Autographa californica* nuclear polyhedrosis virus (NPV) expressing the β -galactosidase gene in both Sf21 and Bm5 cells by *Bombyx mori* NPV p143 helicase gene. *Mol. Cells* **7**, 762-768.

4) Whole book

O'Reilly, D. R., L. K. Miller and V. A. Luckow (1992) Baculovirus expression vectors: a laboratory manual. W. H. Freeman & Co., New York.

Avise, J. C. (1994) Molecular markers, natural history, and evolution. Chapman and Hall, New York.

The Entomological Society of Korea & Korean Society of Applied Entomology (1994) Check list of insects from Korea. Kon-Kuk Univerity Press, Seoul.

5) A chapter in a book

Maeda, S. (1995) Expression of foreign genes in insect cells using baculovirus vectors; in *Insect cell biotechnology*. Maramorosch, K. and A. McIntosh (eds.), pp. 1-31, Boca Raton, CRC Press, FL.

Yoshitake, N. (1984) Silkworm biochemistry; in *Silkworm*. Tosio, I. (ed.), pp. 1-19, KM Publication Co., Tokyo.

6) Software

Swofford, D. L. (1990) PAUP: phylogenetic analysis using parsimony ver. 3.0. Illinois Natural History Survey, Champaign (on disk).

Felsenstein, J. (1993) PHYLIP (Phylogeny Inference Package) ver. 3.5c. Department of Genetics, University of Washington, Seattle (on disk).

7) Ph. D. dissertation

Chang, S. L. (1996) Insect species diversity in Korea. Ph. D. Thesis, Namwon University, Korea.

8) Unpublished GenBank Sequence

Hwang, J. S., S. K. Kim, H. J. Go, S. W. Kang, T. W. Goo, E. Y. Yun and K. H. Choi (2003) Molecular clone of LIM gene from *Bombyx mori*. *GenBank Accession Number AY461436*.

Manuscript accepted for publication, but not yet published should be listed in the reference with estimated date (year) and the words “In press” instead of volume and page.

(Tables and footnotes) Tables should be typewritten separately from the text and each table should include a title. Keep the number of footnotes to a minimum. Use superscript Arabic numerals to depict the footnotes.

(Figures and legends) Good quality photocopies are acceptable. Figures should ordinarily be original drawings. Letters or numbers should be included in the figures contained in a submitted manuscript along with caption for figures. Figure legends should provide enough information so that the figure is understandable without frequent reference to the text.

(Nomenclature, Abbreviations, Symbol, and Chemical and Mathematical Usage) Nomenclature, and Chemical and Mathematical Usage should follow the guidelines in the instructions to authors of international journals published by famous societies. Abbreviations and symbols should be used for those employed universally.

Proofs and Reprint

Manuscripts will be critically read by two or three reviewers, who are selected for their competence in the subject of matter of the paper. When revisions are required, the revised manuscript version should be submitted within maximum of two months from the date of receipt, but earlier response will help earlier publication. Authors are asked to provide the file on 3.5” diskette (Microsoft Word is recommended) in addition to the printout after the manuscript has been accepted for publication. For the foreign submitters electronic submission is also possible. Twenty-five copies of reprint of an article will be provided to corresponding author free of charge.
