해이리 백성 스튜디오 Heyri Baiknong studio

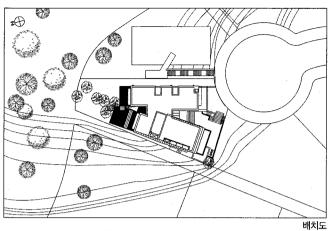

Project team | Song, Ki-sun / Lee, Jong-min / Han, Jea-sung
Client | Han, Tai-sang
Location | Gyeonggi-do Paju-si Tanhyeon-myeon Beopheung-ri
Site Area | 461.20m² Building Area | 166.91m²
Gross Floor Area | 354.37m²
Building to Land Ratio | 36.19%
Floor Area Ratio | 63.57% Structure | R.C
Structural Engineer | Kyung Jai structure Engineers
HVAC Engineer | ENG energy design lab
Electrical Engineer | Vision ENG

General Contractor | Dongin Construction

Building Scope | B1-2F

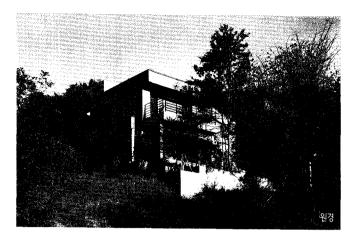

Finishing Materials | copperplate, Exposed Concrete, Wood

Photographer | Byun, Jong-suk | Cost | not disclosed

건축물은 멀리 통일전망대까지 보이는 헤이리에서도 전망이 가장 좋은 경사지에 위치한다. 건축주는 이 전망에 반해 이 땅을 구입했다. 따라서 전망을 최대한 살리고 필요한 기능을 충분히 수용하기위한 노력으로 '시'자 모양의 두 개의 축을 도입하였다. 두개의 축을 따라 필요한 공간을 배치하고 남는 여백의 공간은 전망 확보를 위한 공간으로 정리하였다.

헤이리의 자연은 도시의 그것과 다르다. 요즘이면 이침저녁으로 기러기가 날고 뒷마당의 밤을 먹기 위해 오소리가 나타난다. 주변의 자연과 공존을 위해 건축물의 높이를 낮추고 가능한 건축물이 외 부공간과 접하도록 하였다. 하지만 프라이버시를 요구하는 공간의 경우 적절한 높이와 크기의 데크 를 이용하여 시각적이고 물리적인 보호 장치를 마련하였다.

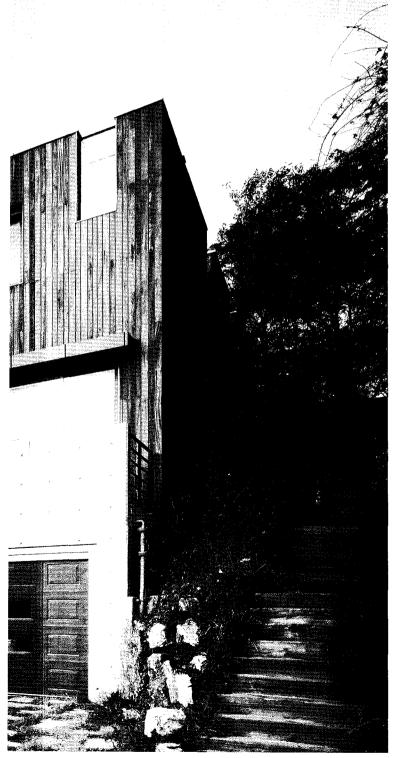

집을 짓는 과정에서 훼손되는 수목을 최소화하기 위해서 설계초기부터 대지내의 수목 위치를 파악하여 건축물과의 공존을 모색했으며 새로 식재되는 나무들도 기존의 수목과 조화되는 수종으로 선택하였다. 헤이리 백농스튜디오는 건축물과 그 건축물이 차지하고 남은 여백사이의 조화와 변화에 집중한 작업이 되었고 그 결과 다양하게 변화하는 건축공간과 주변의 아름다운 자연과의 공존을 얻을 수 있었다.

Client of Heyri Baiknong studio is a modern calligrapher. He separate the alphabet of Hangul, and reassembled it in a way that his work. Each of the alphabet letters in the process of separating and overlapping. It occupied the remaining space as a whole are making attractive. Attitude to his work influenced the design of this house.

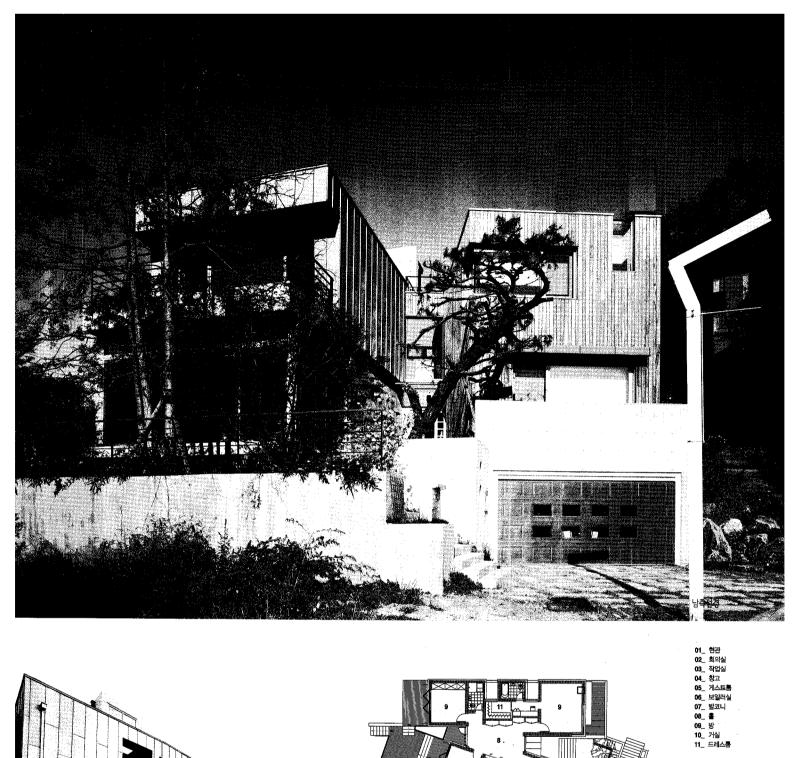

Architecture's view is the best location in Heyri. He was really in love with prospects that's why he bought this land. Therefore, the most expected features of raise to revive construction introduced 'A'-shaped, two axes. Because of view was considered when designing the space of the house, each room was able to be built using minimal necessary dimensions along the two axes.

Heyri's nature differs from the city. Nowadays geese and badgers appears in the city. Natural surroundings to reduce the height of the building to blend the building was flush with the outer space. However the private space contains of proper size of deck, using that appropriate visual and physical safeguards.

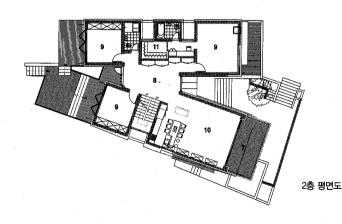

The trees to build homes was minimal damage, from the initial design space to identify trees were in harmony with the buildings. And newly planted trees that are in harmony with the existing tree species were selected. Baiknong studio has focused on the combination of the blanle space. The results varied around the construction area and were able to coexist with natural beauty.
