On page 122, analysis of the freeze-dried powder of *T. molitor* larvae (fdTML) was erroneously expressed as “The food poisoning pathogens, Pb, Hg, and Cd levels were not detected with fdTML and the As level was 0.03 mg/kg, which was lower than the standard index for food (13).” and was corrected as follows; The food poisoning pathogens, Pb, As, and Cd levels were not detected with fdTML and the Hg level was 0.03 mg/kg, which was lower than the standard index for food (13).
