The paper by Lee YJ *et al.* [1] was printed with spelling errors. It was the authors' mistake occurred during revising the manuscript.

Corrected sentences are as follows;

Page 44 (left column), line 19-21:

Therefore, the present study investigated the hypothesis that a highly pure β -1,3-glucan of low molecular weight (around 170 kDa) produced by *Agrobacterium* sp. R259 enhances NK cell activity and suppresses pro-inflammatory cytokines in healthy adults.

Page 44 (left column), line 32-33:

The estimated molecular size of the β -1,3-glucan was approximately 170~250 kDa, as determined by HPLC analysis (Fig. 1).
