Abstract

The Ministry of Patriots and Veterans Affairs decided to designate Goesan County as a comprehensive venue for determining the geography of the land, the efficient management of land, the public opinion of local residents, and the establishment of a group of civic complaints.

In the meantime, Goesan focused on attracting high-ranking government officials, including high-ranking government officials and high-ranking tourist attractions, to attract high-ranking government officials, including high-ranking officials of the National Guard, to promote the nation's bid to attract high-ranking government officials. In this paper, we intend to conduct a study centered on the controversy over the survival of the Korean National Guard. conflict between local governments is a non-authoritative administrative administrative body, it can be regarded as a matter of difficulty by intervening in any autonomous matter, and ultimately, it can be changed to judicial judgment. This is not to say that the residents of Goesan county will protest this time. Even though Goesan promotes regional development and development for local residents, it can not guarantee that the judgment of Goesan County will be held in the same situation. Thus, it should develop a win-win strategy based on the threat of sabotage. To this end, I would like to suggest the following measures.

Keywords: *Environmental Conflict, countermeasures, Patriots and Veterans Affairs, National Cemetery*

1. Introduction

National Institute of Patriots and Veterans Affairs It is because the Ministry of Patriots and Veterans Affairs has a great lack of national cemetery. Currently, the National Cemetery in Korea is located in Seoul, Daejeon, North Chungcheong Province, the April 19 Democratization Cemetery, and Gwangju 5.18 Democratization Cemetery in Gwangju city. More than 10,000 people are buried in the national cemetery every year, but there are currently 20,000 free spaces. Accordingly, the ministry decided to build a new National Cemetery in South Gyeongsang Province and build a patriot in Chungcheong Province. Currently, a total of 500,000 people in the national cemetery are estimated to have reached 150,000, including 150,000 workers, 52,000 veterans, and 40,000 soldiers discharged from military service.(1)

The Ministry of Patriots and Veterans Affairs decided to designate Goesan County as a venue for determining geographical conditions, including geographical conditions, efficient management of land, local residents' opinion of local residents, and whether or not the group has been indicted.

In the meantime, Goesan focused on attracting high-ranking government officials, including high-ranking government officials and high-ranking tourist attractions, to attract high-ranking government officials,

including high-ranking officials of the National Guard, to promote the nation's bid to attract high-ranking government officials. The Ministry of Patriots and Veterans Affairs said, " We will set up a patriot at 4,900,000 m² (38,600 m²) in Goesan County, North Chungcheong Province, and construct the 10th annex of Bongha Facilities, Hyungchung Tower, Hyungchung Hall, Hyungchung, and Parking Lot.(2) "

The construction of the National Guesthouse Guest-Government Agency was launched in October 2015, with the establishment of 10 billion won worth of seats, such as 10-year-old wooden coffin, 1,000 won, and the like.

2. Environmental Conflict

2.1 Theory and Case

The Ministry of Patriots and Veterans Affairs said, " We received the final confirmation that the Korean Veterans Association, which is worth billions of won by 2019, has been confirmed to be in Goesan County for the past six months. " Goesan County is expected to play a major role in revitalizing the economy.

This time, the National Security Council will transform itself into a national security center for protecting the nation's patriotism, the pagoda, and the rest of the country.

Land prices are low and the land acquisition can be handled smoothly, and residents are less likely to be able to land their own lives. .

Goesan County, which was established in November last year, will play a role in promoting the establishment of a national security guard in the region of Goesan-gun, which was relocated to Goesan Island, and will play a role in promoting the revitalization of the region.

Goesan expects the relocation of the residents to increase the number of people living in the region and increase the number of tourists to the region by increasing the number of people visiting the country. Around 50,000 visitors are expected to be expected to reach 400,000 by 2025. Also, it is expected to contribute greatly to the creation of local residents and the creation of local residents, such as the Resident Employees ' Office, recruitment of contract workers, recruiting employees, and building a total of KRW 80 billion in civilian facilities.

In particular, it is believed that the establishment of the National Agricultural Cooperative Federation in addition to the Mecca of organic farming and fishing villages in 2015, including the establishment of military facilities and training facilities, is the site of the establishment of the National Security Council and the establishment of a regional community, such as the promotion of national pride and awareness of local residents, and the rise of local residents. It is an opportunity for the nation to serve as a guardian of patriotic spirit, which honors patriotic spirit and honor patriotic spirit, as a representative symbol of patriotic spirit.

The Korean National Defense Commission (NDC) is known to have been a mere shadow of the economic revitalization of the Korean National Guard. Moreover, bureaucracies enjoyed by bureaucrats are also illusory. We don't hire people who are victims of the fallen patriots, nor do we hire them, nor do we hire decent jobs. In addition, some 100 billion won will be found in the Goesan area, which will result in the construction of regional construction games. (4)

Last year, a statement submitted by 930 residents of the National Autonomous Police Agency submitted a statement to North Chungcheong Province, Goesan County, Goesan County, and Goesan County. Based on the report, the residents of the National Autonomous Body and the Residents ' Educational Development Institute, which suffered from the instability of the area, were found to have suffered psychological damage, such as the deterioration of the region, the violation of clean images, the revitalization of the county's regional economy, and the revulsion of the community. Residents of Kyungcheong, Gyeongbuk Province, and North Jeolla Province said, " We have been looking for a tour of the region. " They said, " Even though there are no people who come to buy the land, they are told that they can't come to terms with them even if they try to sell and move. "

The Korean Veterans Association said, " There are several civic groups, including Moon Kwang-myeon, the committee and the council, who oppose the relocation to the residents. " It said that it was meant to ignore the local doctors. The government added, " We are planning to build a new branch of the DMZ, and the establishment of the Korean National Guard is not being formed. "

Public opinion and civil servants are also showing signs of solidarity throughout the village. Farmers and civic groups held placards featuring the opposite.(5)

2.2 Result and Discussion

Recently, the Korean National Defense Committee said, " The agreement between the former and the Japanese National Defense Committee is facing a rift among the residents. It is also feared that conflicts are becoming more acute among residents around the community. In September 2012, Goesan offered a meeting with representatives of civil servants to appease the residents of the region, including a meeting with officials of the National Cemetery in Daejeon, the establishment of a special entrance ceremony, the establishment of a cemetery for locals, and the establishment of 20 billion won. Over the past two years, the military has spent 4 billion won on housing improvement projects, including housing improvement projects, installing cold storage facilities, purchasing farm equipment, purchasing farm facilities, and installing solar panels. Supported by 130.1 million won for improving housing environment improvement projects, including remodeling apartments and remodeling facilities, 1.82 million won for residential improvement projects, 1.72 million won for villages and towns, 1.82 million won for farm villages, and 170 million won for farm facilities and 170 million won for farm facilities, and 20 million won for installing solar power plants. In the process, some residents are chosen for their projects, and others are not selected.(6)

In particular, 10 billion won is offered to residents, and 10 billion won is applied annually to Moon Kwang-myeon, and 10 billion won is a key task. Despite the majority of households supported by generations of households, some argue that there is no benefit to the underprivileged, and there are conflicting views on the issue.

Residents argue that they should disclose the accounting process of the committee members for the generations to come. They also say investigations should be conducted in order to investigate illegal law enforcement by investigating whether it was conducted properly.

According to reports from the Chungcheong provinces, Goesan County and Moon Myeong-min are known to have some absurd views and controversies. According to the MOU, facilities can not be installed within the Japanese Defense Agency and installed in the civilian station (entrance to the National Cemetery) for 50 years. Fastories include restaurants, flower shops, lounge rooms, snack booths, groceries, and parking lots. The exclusive route to the National Defense Agency is supposed to be built simultaneously with the National Defense Agency (NSA). However, the committee members selected by the committee will participate in Goesan County, the Veterans ' Affairs and Veterans ' Affairs course. Support for each relocation project is provided early in the year. If the project is held in Guesan County, Korea, it will be preferentially assigned to Mukwang-myeon. The Act on Special Measures for the Unification of Korean Peninsula is enacted according to the establishment of the National Guard. All expenses involved in this MOU are borne by Goesan County. In order to quell public opinion of the residents of Goesan National Cemetery, 20 billion won will be spent to finance the relocation of the National Autonomous Prefecture. The military council said the agreement was unreasonable regarding the construction of private roads involving tens of billions of won. A military official said, " We will strive to provide subsidies amounting to 20 billion won annually for subsidies backed by 20 billion won, and the government will be willing to push ahead with the plan to support the project. "(7)

Currently, the government is wasting taxpayers ' money, including the establishment of a 200-billion-won citizen, 38 billion won in relocation routes, and 18 billion won in industrial complexes." How long will it be before the tax havens are put to spy on the executive mission to monitor and check the execution of the executive duties, " said a resident of the council.(8)

With excessive support for the "bid for assistance" and the related regions, criticism has been raised with criticism about the controversy over the fairness of the town and the tax evasion. "As far as the MOU is concerned, it is almost axiomatic that the military will have to give preferential treatment to the public," said Rep. A. A member of the committee, who has to pay for a special bill for the sake of anonymity. "The Council of the Republic of Korea," the 6th largest parliamentary bloc, said, "It is a parliamentary council to act as a lawmaker," adding, "Members doing their utmost to do their best for local residents are doing their duty." "There is no guarantee that the anti-Consumption and the military will be subject to a statute of limitations," said Rep. B. B. Rumsfeld, who is also quoted as saying, "We are still wasting money on military matters, although we have yet to make any pledges." Also, it is understandable that sufficient compensation is granted to residents in the area where the patriotic institution is detained, but it is not directly related to all residents, and is wasting taxpayers' money and wasting taxpayers' money. "Regarding this, military officials said, "We will continue to abide by the promise, but we will continue to abide by the pledge of 20 billion won," said a military official.(9)

Because the conflict between local governments is a non-authoritative administrative administrative body, it can be regarded as a matter of difficulty by intervening in any autonomous matter, and ultimately, it can be changed to judicial judgment. This is not to say that the residents of Goesan county will protest this time. Even though Goesan promotes regional development and development for local residents, it can not guarantee that the judgment of Goesan County will be held in the same situation. Thus, it should develop a win-win strategy based on the threat of sabotage. To this end, I would like to suggest the following measures.

First of all, I think we need a grand solution centered around the center of the bureaucracy, which is centered around the center of the population and the informed consent of the residents. (10)

Goesan County, local councils, local media, and civic groups should cooperate with political circles, saying that Goesan should not overlook the fact that it is bigger than the opposite.

3. Conclusion

Goesan National Cemetery, which has already been established as a construction site, wants to emphasize the importance of contributing to the revitalization of the local economy by establishing a shrine and arranging special activities for the promotion of tourism and tourism based on visitor visits.

First, Goesan National Guard should increase its role as a multiplex cultural space.

The national cemetery belongs to all people. Therefore, it should provide a kind of benefit to the general public, including the nearby residents.

For this reason, the National Cemetery in the National Cemetery is needed. In many countries, including the United States, the National Cemetery in which the National Cemetery is run, the National Cemetery is provided as a resting place for ordinary citizens, and it is not confined to the national cemetery, but it is mostly regulated by the public cemetery. These parks can not be viewed as abhorrent facilities to the cemetery facilities, and they tend to prefer preference to neighborhoods adjacent to the cemetery to benefit from the park's space. The park needs to be built in a densely populated area, and parks the park. (11)

Secondly, we will have to actively collect opinions from residents during the founding of the Korean Veterans Association.

Third, it should comprehensively analyze the effects of the local economy, including the revitalization of the local economy, and disclose it to the residents.

According to the Korea Development Institute (KDI), the Korea Development Institute analyzed that the local economic revitalization of the region was relatively low compared to the results of the project, and the automobile dust, vibration noise generated by the construction of the road, and dirt on the road surface and dirt caused the accumulation of dirt on the site and dirt on the site.

Fourth, local residents support expenses should be distributed evenly.
