This is a retraction of the article “Midazolam use in pediatric dentistry: a review” in volume 20 on page 1.

This article has been retracted at the request of the Editor-in-Chief following a discussion by the Editorial Board Members' because the authors plagiarized a previously published paper that had appeared in : Razavi Int J Med 2014; 2(3): e16913 (author: Mahshid Bagheri, title: The Use of Midazolam in Paediatric Dentistry: A Review of the literature, https://www.civilica.com/Paper-JR_RIJO-JR_RIJO-2-3_002.html).

An important obligation when submitting a paper for publication is that the authors should explicitly declare the originality of their work.

This article presented the simple copy of previously published paper. This article reflects severe abuse of the scientific publishing system, and has therefore been retracted. Journal of Dental Anesthesia and Pain Medicine takes this situation very seriously and apologizes to the author of the original article and the readers of the journal.
