Due to an unfortunate oversight Figure 4 was omitted from this paper. Figure 4 appears below.

Fig. 4. Effect of TLR4 on GLE-mediated expression of immunomodulators through the activation of p38, JNK and NF- κ B. (A) The cells were pretreated with TAK-242 (5 μ M) for 2 h and then co-treated with GLE for 24 h. For RT-PCR analysis, total RNA was prepared. GAPDH was used as internal control for RT-PCR. (B) RAW264.7 cells were pretreatment with TAK-242 (5 μ M) for 2 h and then co-treated with GLE for 1 h. All cell lysates were subjected to SDS-PAGE and the Western blot was performed using antibodies against p-p38, p-JNK, p-I κ B- α or actin. Actin was used as internal control for Western blot analysis.

The authors apologize this mistake.
