

***Erratum: Spatiotemporal Clusters and Trend of Trichomonas vaginalis* Infection in Korea**

[*Korean J Parasitol* 60(2): 97-107]

In Table 1, there are errors in the number of total cases and the average in averaged cases. Table 1 should be revised as below. In the general characteristic subsection of RESULTS on page 100, the first paragraph also needs to be corrected as “A

total of 1,178,505 trichomoniasis cases was reported, with an average of 130,945 cases/year during the study period of 2012 to 2020”.

*DOI of the original article: 10.3347/KJP.2022.60.2.97
